CLINIC PARTNERSHIP GUIDE

Blink Health is an additional resource to consider when the medication your patient needs is not available on AmeriCare U.S. Access Portal.

Blink Health negotiates with pharmacies, pharmacy benefit managers and pharmaceutical companies to secure some of the lowest prices on over 15,000 medications.

The Blink Health and AmeriCare partnership will help deliver consistent, affordable access to medication at your clinic. While AmeriCare will continue to make free medicine and supplies available to clinic partners, Blink Health is an additional resource that provides access to low-cost medication when free medication is not available.

ACCEPTED AT OVER 57,000 PHARMACIES, INCLUDING:
Also accepted at [Walmart](#) and nearly every other independent pharmacy.

There are two ways to help your patients save with Blink Health.

If free medication is not available, your patient can either pay for their Rx directly with Blink Health, or the clinic can purchase the patient's medication with Blink Health on their behalf. Clinics choosing to purchase medications on behalf of their patients will receive a monthly invoice from Blink for the medications purchased.

1 Patient Pays

Simply show your patient the app or mobile website (BlinkHealth.com) and they can find low prices on their prescriptions.

2 Clinic Pays

Using the Blink Health widget within the AmeriCare U.S. Access Portal, your clinic can pay for a patient's prescriptions. The following pages in this booklet walk you through how to use the widget.

Using the Clinic Pays Feature:

GO TO THE AMERICARES U.S. ACCESS PORTAL
AND YOU WILL FIND THE BLINK HEALTH WIDGET.

Click [here](#) to learn more about BlinkHealth

The Clinic Pays widget is located at the bottom of the AmeriCare U.S. Access Portal

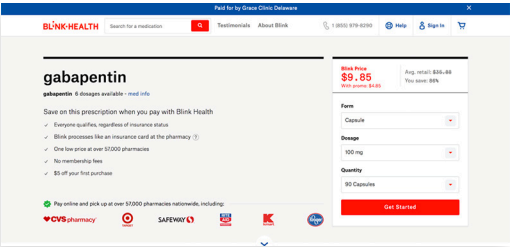

STEP 1: FIND YOUR PATIENT’S MEDICATION

Select Clinic Pays, specify quantity, click “Continue to Blink Health”

STEP 2: CHECKOUT ON BLINKHEALTH.COM

Your patient will be charged \$0 at checkout, and your clinic will receive an invoice at the end of the month

STEP 3: PATIENT PICKS UP RX AT THE PHARMACY

Patients will receive their Blink Card via text or you can print it for them. This is what they’ll show to the pharmacist & pay \$0 at pickup!

Get Started

1

Get started with clinic pays by reaching out to email abpartnership@blinkhealth.com or call 1-855-317-2079

2

Get started with patient pays by helping your patient check out on blinkhealth.com or in the Blink Health mobile app. Don't forget to use the AMERICARES coupon to get \$10 off their first fill.

FAQs

Is there a list of pharmacies in your network?

Blink Health is accepted at over 85% of pharmacies nationwide. The best way to see if your pharmacy accepts Blink is to visit our pharmacy search tool at www.blinkhealth.com/pharmacies.

How stable are Blink prices?

The price for a medication on Blink is the same at every pharmacy in our network. We do update that price from time to time, but typically no more than a few times per year.

Does the patient need a credit card?

No. If the patient pays you, and you leverage the Clinic Pays feature, the patient can pay for the medication in cash but still get access to the Blink price.

Does Blink check immigration status?

No. Blink does not require any form of immigration status verification or information.

How does Blink compare to 340b pricing?

It depends on the medication. For some medications, Blink is less expensive, and for others you should use 340B if it is available to you. Note that 340B prices change much more frequently and substantially than Blink prices, so it pays to check the Blink price whenever you're considering 340B.

Does Blink work with e-prescribing?

Yes. Blink works whether you're e-prescribing or using paper scripts.
